

Gabriel González

ABOUT ME

Certified Full Stack Developer with university accreditation, experienced in designing and implementing scalable web systems and end-to-end digital solutions. Skilled in modern frontend technologies (Astro, React, Tailwind CSS, Framer Motion, JavaScript) and backend development (Supabase, Express, PHP), consistently integrating security, performance, accessibility, and professional design standards into every project. English proficiency: Upper-Intermediate / B2.

I bring 3 months of professional experience and 8 months of collaborative project work, with active contributions across the full software development lifecycle—including planning, implementation, delivery, and long-term maintenance of scalable digital solutions.
